

Table 1: Potash Corporation Climate Risk and Mitigation Summary

Climate Risk	Problems Posed to PotashCorp	Mitigation Strategies
Excessive moisture and flooding	Increases brine quantities and tailing pond levels	Infrastructure: Deep-injection wells and safe storage facilities
	Problems compound when they occur repeatedly	Proactive planning
Water scarcity and drought	Less water available for mine operations	Increased water efficiency efforts
	Risks to existing water supply	
Extreme weather events	Increases brine quantities and tailing pond levels	Proactive planning
	Damage to mine infrastructure
